Large-Area Cleaner

SAVES TIME

LOW CONSUMPTION

CLEANS AND MAINTAINS

PROTECTS YOUR INVESTMENT

EASY TO USE

PERFECT TECHNOLOGY FOR PERFECT FLOORS

HARO Sports Floors are an investment in long-lasting performance. But even a first-class product needs regular cleaning and care to ensure that it maintains its value and function for years to come. That is why we recommend MAROB GIANT. This professional cleaner combines quality, performance and easy handling.

1.

Quick

Whether it is cleaning or maintenance, MAROB GIANT ensures fast results. One person can effortlessly treat 1200 m² in 25 minutes. As drying times are fast (about 10 – 15 minutes), the floor is ready for use again with minimum downtime.

2.

Environmentally friendly

MAROB GIANT saves resources. It needs no electric power and only a little water and recommended cleaner (15–20 ml/m²). For 1200 m² you need only 20 l of clear water. It leaves no dirty water on the floor. It also increases the intervals between intensive cleaning as the sports floor is thoroughly cleaned during routine cleaning.

Simply slip on the special mop pad

Pour the cleaning / care solution into the water tank (35 l capacity)

Evenly dampen the first mop pad

Empty the tank completely

Quickly and evenly apply the floor care product

Uses 2 mop pads (1 damp, 1 dry) for routine cleaning

3. Versatile
MAROB GIANT is a master of all disciplines: whether you're carrying out an intensive clean or carrying out routine cleaning and maintenance. It is just as suitable for both water-sensitive floors (e.g. parquet or linoleum) and synthetic floors made of polyurethane, PVC, etc.

4. Ergonomic
One of MAROB GIANT's greatest strong points is its ergonomic, easy-to-use design. There is no strain on the user's shoulders or cervical spine.

5. Thorough
MAROB GIANT removes clinging or sticky dirt (e.g. beverage stains) and loose dirt (e.g. fine dust and grit) during daily maintenance. The sport floor remains clean and hygienic, maintains its sport-technical properties (e.g. slip resistance) and thus complies with the standards DIN 77400, DIN 18032 part 2 and the sports performance requirements for class A4 EN 14904.

How to use MAROB GIANT:

Micro-nozzles evenly apply the cleaning solution to the first Textronic special mop pad. The inclined position of the mop further increases the abrasive effect. It is followed by the second Textronic mop pad, which is dry and picks up the loosened dirt. While passing forward and back over the floor, MAROB GIANT cleans and maintains the surface in every stroke. It's that easy.
